### **Diploma in Engineering Technologies**

16-19

Adult

Engineering shapes the world around us, from the machines at the heart of the industry to the electronic devices we use at home – engineering is the future.

There's no better place to start your career in this exciting industry than here at Cornwall College.

This course is all about mastering the essential skills that you'll need during your engineering career, giving you experience with the very latest technology that is used within the industry. The focus is on developing your knowledge application, experimental and practical engineering techniques. Whilst preparing you to professionally present your findings and demonstrate these essential skills.

You will be using cutting-edge technology such as virtual welding equipment. As well as you will be using industry spec. equipment such as milling and turning machine, welding machines commonly used by coded and specialist welders donated by local employers, containing the latest control and automation components – experiences that prepare you for employment locally, regionally and beyond.

The Level 2 course is the perfect opportunity to discover the area of engineering you would like to specialise in, with tutors who will guide you through all of the potential opportunities.

At Cornwall College, we have enthusiastic and highly skilled engineering tutors with extensive industry experience, who are fully committed to helping you develop the skills, knowledge and experience needed to become a fully qualified engineer.

Successful completion of this course provides you with essential skills to progress onto the Level 3 Advanced Technology course or the Level 3 90 Credit Diploma in Engineering.
