

Film & TV: UAL Level 3 Extended Diploma in Creative Media Production and Technology

16-19

Adult

If you want to work in television, film, journalism, advertising, radio, or animation then our award-winning media department can help you achieve a bright career. Our former students are now working all over the world as camera operators, film directors and producers on exciting projects such as Star Wars films, American Idol, The X Factor, Britain's Got Talent and more.

We offer two options for you to start your studies in the media and film industry depending on your GCSE results. Our Level 3 course offers you the choice of university study or successful employment on completion of your course. Our Level 2 course is ideal should your GCSE results not be what you expected, with the option to progress to Level 3.

The extended diploma is coursework based, giving you complete creative freedom. It's all about giving you the practical skills and experience to lead a creative production.

You'll learn about and put to good use a selection of professional equipment; take full advantage of the television and sound studios and great edits using the Adobe Creative Cloud Suite

As well as using all this industry-standard equipment as part of your studies, you'll also take part in visiting lectures explaining their experiences and how they got into the industry; we run several trips each year including events and competitions which will help you discover routes into the creative sector.

If you are interested in building a career in the television, film, journalism or advertising industries, our two year Level 3 Creative Media Production course is perfect. You will have a wide variety of projects to complete and you will develop your understanding of camera work, film production, video & photo editing, journalism, animation, and much more. You will also take part in our award winning film school.
